JOB ATTACK STRATEGY

24-HOUR DOMINANCE RULE

- Apply in first 24 hours = visible
- 24–72 hours = competitive
- After 72 hours = ignored pile

Why?

- **Hacker News** → founders scan early replies
- **Wellfound** → early applicants float to top
- **Product Hunt** → hires happen during launch week

⚡ Rule:

Morning alert. One scan. Instant apply.

Speed = unfair advantage.

RESUME IS NOT A WEAPON

Resume = PDF decoration.
Proof = conversion machine.

PYTHON BOYZ

Attach:

- 📁 GitHub (3 pinned repos only — clean, focused)
- 📺 2-min Loom demo
- 🌐 Live deployed link
- 💡 6-line mini case study

On:

- **CutShort**
- **Instahyre**
- **Himalayas**

Your profile must scream:

“I build. I ship. I finish.”

SEED & SERIES A = GOLDMINE

Why you target early-stage:

- ✓ Fewer applicants
- ✓ Founder sees your profile
- ✓ No HR gatekeepers
- ✓ No pedigree obsession
- ✓ 1–2 round decisions

Use:

- **Y Combinator** directory
- **Indie Hackers**
- **Startupers**

Avoid unicorn career portals unless you enjoy waiting 3 months.

THE 2-MINUTE LOOM = 10X CONVERSION

Structure:

- 👋 20s intro
- 💡 Show relevant build
- ⚙️ Explain 1 smart technical decision
- 📊 Show measurable result
- 👏 Close with:
“I’d love to improve your [specific feature].”

This alone destroys 95% of competition.

AI ROLES = PROOF OR REJECT

If applying through:

- **Kaggle**
- **Papers With Code**
- **Hugging Face**

You must show:

- 📊 Reproducible experiments
- 📁 Clean repo structure
- 📈 Benchmarks
- 📝 Technical blog
- 📁 Real datasets

No GPT wrappers.

No “AI enthusiast” bio.

Signal > buzzwords.

TIER-2 / TIER-3 HACK

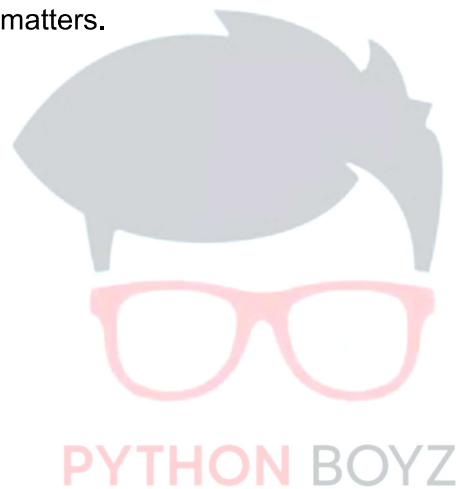

Stop competing where brand matters.

Use:

- **Hasjob**
- **Peerlist**
- **Devfolio**
- **Outreachy**

Open Source > College tag.

Execution > CGPA.

DIRECT FOUNDER STRIKE

After applying:

DM founder:

“Hey [Name],
I applied for [Role].
Built a quick demo solving [specific problem].
2-min walkthrough: [link]
Would love feedback.”

Works extremely well on:

- **Hacker News**

- **Product Hunt**
- **Y Combinator** startups

You bypass ATS.

You talk to the decision-maker.

DAILY ATTACK SYSTEM (30 MIN)

Morning (10 min)

→ Scan 3 boards

Afternoon (10 min)

→ Apply to 1 high-fit role

Evening (10 min)

→ 1 founder outreach

That's it.

No 50-app spam.

No burnout.

MICRO-INTERNSHIP OFFER

In early-stage startups (Seed / Series A):

Say:

“Happy to do a 5-day paid trial to prove output.”

This removes risk for them.

Risk removal = faster hiring.

Works best with:

- **Indie Hackers** founders
- **Wellfound** startups

WHAT TO AVOID

- ✗ LinkedIn Easy Apply spam
 - ✗ Generic “passionate learner” lines
 - ✗ 40 applications/day
 - ✗ Corporate portals only
 - ✗ No deployed proof
-

FINAL REALITY

Jobs are not won by:

- **Degrees**
- **Certificates**
- **Motivation**

Jobs are won by:

- ⚡ Speed
- 🧠 Proof
- 🎯 Direct Access

Everything else is noise.

PYTHON BOYZ

QUICK HACKS

PRE-BUILD BEFORE APPLYING

Don't apply. Contribute first.

- Find startup via Y Combinator / Product Hunt
- Build 1 small improvement (UI, API, performance)
- Record 60–90 sec Loom
- Send demo instead of resume

You shift from candidate → contributor

Response rate multiplies.

APPLY TO “INVISIBLE JOBS”

Most seed startups never post roles.

- Track newly funded startups
- No careers page = opportunity
- Cold email with specific solution

“I built X that improves your Y. Here's demo.”

Zero competition pipeline

You enter before public hiring.

WARM VISIBILITY BEFORE APPLY

On Hacker News or Product Hunt:

- Leave 1 smart technical comment
- Ask insight-level question
- THEN apply next day

Founder recognizes your name

Warm > Cold application
